README.md 2025-01-11

UCL COMP0002 Haskell_Coursework

Compile and Run the File:

1. Use ghc to compile the file:

```
ghc cwk2_24-25.hs
```

2. Execute the generated file:

```
./cwk2_24-25
```

3. Expected result (On my win11 laptop):

Load File into GHCi (Interactive Mode):

1. Open the terminal and start GHCi:

```
ghci
```

2. Load the file into GHCi:

README.md 2025-01-11

:1 cwk2_24-25.hs			

3. Run the main function or any other defined function:

ghci>main ghci>tribonacci 7 ghci>lazyCatererSeq 6

ghci>pretty myHorse
